

KEY FEATURES

- DURABLE CARBIDE FOR QUICK KNIFE SHARPENING
- CERAMIC ROD FOR SCISSOR SHARPENING
- SHARPENS RIGHT OR LEFT-HANDED SCISSORS
- SAFETY GUARD FOR FINGER & THUMB PROTECTION

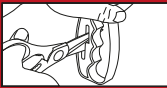

HOW TO USE

FOR KNIVES

1. LAY THE KNIFE FLAT WITH THE CUTTING EDGE FACING UP, LEAVING ABOUT 1 INCH OF THE BLADE EXTENDED PAST THE EDGE OF THE SURFACE. HOLD THE HANDLE FIRMLY.
2. POSITION THE SHARPENER CLOSEST TO THE HANDLE OR HEEL OF THE BLADE AT A 90-DEGREE ANGLE.
3. PULL THE SHARPENER ACROSS THE BLADE FROM HEEL TO TIP 5-6 TIMES, APPLYING STEADY PRESSURE AND FOLLOWING THE SHAPE OF THE BLADE.

FOR SCISSORS

1. USE THE CORRECT SHARPENING SLOT FOR YOUR RIGHT- OR LEFT-HANDED SCISSORS, ENSURING THE MATCHING MARKINGS ARE FACING YOU BASED ON THE TYPE OF SCISSORS.
2. HOLD THE SHARPENER UPRIGHT AND INSERT THE SCISSORS FULLY INTO THE CERAMIC SHARPENING ROD SLOT.
3. CLOSE THE SCISSORS AROUND THE ROD AND PULL THEM THROUGH WHILE KEEPING THE BLADES TOGETHER, USING MODERATE PRESSURE. REPEAT 8-10 TIMES FOR DULL BLADES. VERY HARD STEEL MAY REQUIRE ADDITIONAL PASSES.

AFTER USE CLEAN THE SHARPENER WITH A DAMP CLOTH, AVOIDING RINSING WITH WATER. STORE IN A DRY PLACE. THE CARBIDE SHARPENING EDGES CAN BE REVERSED AND REPLACED BY REMOVING THE SCREWS.

WARNING:
KEEP FINGERS AWAY FROM THE
SHARPENING SLOT DURING USE
TO AVOID SERIOUS INJURY.
